

# DIY SKATEBOARD

Step 1.  
Build the A4 drawings together

Step 2.  
Draw your own Design

Step 3.  
Stick the Design onto to the wood you are going to recycle

Step 4.  
Cut the outline of the board with a hand saw or a power saw or whatever you have

Step 5.  
Drilling the Skate Truck Hoels:

Begin with a 1mm drill bit and work your way up until the final 5mm Hole. This ensures that you keep the holes aligned.

Step 6.  
Use your Imagination for applying a griptape or any non-slip surface onto the deck.

Step 7.  
Decorate it with your own graphics

Step 8.  
Put the trucks and the wheels on it.

Step 9.  
enjoy the ride
